

Six-axle Flat Wagon / RandomSkin

Samms 710

Names in RW:

**L59 Samms 710, L59 Samms 710 Beton, L59 Samms 710 Stahlbramme
L59 Samms 710 Stahlrohre**

This special flat wagon with six axles has been acquired by the DB between 1963 and 1977 in order to transport bulky goods, heavy roll-formed profiles as well as track vehicles. The wagon is equipped with a bottom of pinetree planks and can stand a wheel pressure up to 5 tons.

The freight wagons use the vR Feature RandomSkin.
All freight wagons in this package use automatic train back plates.

RandomSkin: When the wagons are placed the wagons texture will change in between 5 seconds to one out of four possible.

Links for QuickDrive are included in the package.
